

Monitor PC – how to install the illuminArt Background

Access the illuminArt Background site: www.illuminart.com/backgrounds and choose your background (select the “Monitor” version)

- **IE (Internet Explorer):** Once you see the background image “right click” on the image and select “Set as Background”.
- **Firefox (Mozilla):** Once you see the background image “right click” on the image and select “Set as Desktop Background”.
- **Chrome (Google):** Once you see the background image “right click” on the image and select “Save image as...” to a known area on your computer. Navigate to the saved image and double click on it – this should launch Windows Photo Viewer. “Right click” on the image and select “Set as desktop background”.

If this doesn't work – open the saved graphic in Internet Explorer and follow the instructions in the first bullet above.

- **Opera:** Once you see the background image “right click” on the image and select “Use image on the desktop”.
-
